

360° Industrial Panorama of the Comarca Lagunera

The dataset presented below provides a detailed inventory of the more than 131 companies located in the Comarca Lagunera, organized by name, country of origin (national or foreign), and branch of activity.

This table reflects the breadth and specialization of the regional productive fabric, where the following coexist:

National and international investors from countries such as the United States, Japan, Korea, Germany, France, Italy, the Netherlands, China, Canada, India, and Finland, along with a strong presence of Mexican firms.

Strategic sectors such as automotive (engines, harnesses, wiring, and components), agribusiness (fertilizers, agricultural machinery, grain storage), plastics and packaging, metals and casting, food and beverages, pharmaceuticals and chemicals, among others.

Complete value chain, from the manufacturing of inputs and components to the distribution of consumer products and automation, logistics, and technology services.

By concentrating high-value-added actors and critical services, these data highlight La Laguna's industrial dynamism and its position as a near-shore hub for manufacturing, logistics, and innovation projects.
